Chassis: 0,75" silk dome tweeter
 3" carbon fiber glass bass/mid
Dimensions: 175 x 119 x 152 mm (HxWxD)
Weight: 1,69 kg each

Size doesn't matter

The Speaker Box 3 E Carbon proves that a small speaker can sound big. Due to its compact size, the speaker is ideal for use as a desktop monitor, but also for home cinema systems. Wall mount brackets are available separately.

The speaker delivers an audiophile flat frequency response from 83 to 20.000 Hz with flawless details. Due to its small woofer diameter, it offers a great impulse response, resulting in a precise stereo image and depth. Bass frequencies are played easily with the help of the rear firing port. The voicing is quite open sounding without getting harsh at any time.

We recommend connecting it with an amplifier with an output power of at least 10 watts per channel. The Stereo Box S3 BT or MaiA S3 are perfect partners for this speaker.

The look of the Speaker Box 3 E Carbon is subtle but classy, allowing it to be included in any interior style. It is available in satin black and white painted, or real wood walnut veneer. Speaker grills in black are included in the box.
