Product Announcement

New Roon Nucleus One and Nucleus Titan servers coming to the UK
Get the best Roon experience possible with a dedicated server.

Didcot, Oxfordshire – 21st November 2024
Since its introduction in 2015, Roon has transformed the experience of browsing music. Everything about your music – browsing, discovery, collecting, and listening – is more engaging with Roon, and the software has earnt itself a reputation as the solution of choice for music aficionados around the world.

With the launch of the Nucleus and Nucleus+ servers in 2018, Roon created a solution for software users to create a reliable home environment on which to run Roon, using a dedicated server without the need for any DIY set-up. Today, Henley Audio are delighted to announce the imminent UK availability of Roon's latest generation servers – the Nucleus One and Nucleus Titan.

Nucleus One (UK SRP £599.00) and Nucleus Titan (UK SRP £3,899.00) are the only music servers built for Roon, by the Roon team. Both were first released to the US market earlier this year, and both are now ready to launch in the UK during November 2024, available through www.roonlabs.co.uk and approved Roon Nucleus resellers.

By adding a Nucleus server to a home audio system, Roon users can enjoy a seamless experience with the software and tap into advanced features without fear, as Nucleus servers run on a dedicated version of Roon OS.

Learn more about the new Roon servers below…

Roon Nucleus One *in detail*

Nucleus One sets a new standard in the Nucleus product line. Comparable in performance to the previous Nucleus model, Nucleus One is an affordably priced, dedicated Roon server moulded from high-quality polycarbonate with visual characteristics that echo the premium Nucleus Titan. Priced appealingly, Nucleus One is the perfect choice for anyone seeking a reliable Roon server that offers a best-in-class music experience at an unrivaled price point.

Features include:
- The most affordable dedicated Roon server on the market.
- Delivers Roon OS reliability and performance to all Roon users.
- Flexible connectivity: two USB-A, and one audio-only HDMI port.
- Provides space for 2.5" internal SATA drives for up to 8TB library storage capacity.
- CPU cooling is assisted by a quiet internal fan.
- Precision moulded, modern matte black, high-quality polycarbonate enclosure.
- Exterior design aesthetics evoke those of Roon's flagship Nucleus Titan server.

|

Roon Nucleus Titan *in detail*

Nucleus Titan is Roon's flagship server. It fuses next-generation technology with advanced technical design, precision manufacturing, and aesthetic customisation. Customers can choose from three customisable shell material options – metal, stone, and wood – to create a one-of-a-kind server/streamer statement piece perfectly matched to their tastes and listening space. Nucleus Titan is the only choice for those seeking a premium Roon server.

Nucleus Titan features include:

- Vast CPU, efficiency and RAM speed upgrade over the old Nucleus Plus server.
- New fanless thermal management system combines with high-efficiency CPU heatsink.
- Precision-machined billet aluminum enclosure crafted from a solid block.
- Stunning aesthetics, designed for display and admiration.
- Available in three elemental shell finishes: Metal, Stone (composite), and Wood.
- Accommodates the most voluminous music libraries and multi-zone audio configurations.
- Exterior design echoes Roon's music discovery features and the eclectic nature of music collections.

Library Capacity:	Over 10,000 albums (100,000 tracks)
Multi-Room Streaming	Over 6 Simultaneous Zones
DSP Capability:	All MUSE DSP functions available
I/O Ports:	1 x USB 3.2, 1 x USB 2.0, 2 x USB Type C 3.0 (Thunderbolt compatible) 2 x audio only HDMI, Ethernet LAN
Internal Drive:	2.5" SATA SSD or HDD up to 15mm drive height
Dimensions & Weight:	276mm (W) x 276mm (D) x 57mm (H), 3.18kg

SRP £3,899.00

roon

About Roon

Roon is a music player platform for music enthusiasts, which features a rich interface for browsing and discovering music, compatibility with almost any audio device, and a playback engine designed to deliver the best possible sound. Roon is available for all popular operating systems and manufactures a line of hardware server appliances called Nucleus.

Roon operates as a standalone HARMAN business.

HENLEY AUDIO

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, we work to deliver excellence in both product and service.

Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support, and warehouse teams to offer the full turn-key solution for suppliers. The brands we represent are not only highly regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
