Pick MM 5

Premium moving magnet cartridge

MSRP 399 € (incl. VAT)

Replacement stylus: MSRP 299 € (incl. VAT)

- Moving Magnet principle
- Split pole pins enable flat frequency response
- Strong cantilever based on DJ cantilevers
- Suitable for low to medium tonearm masses
- Natural dynamic sound reproduction
- High resolution sound stage
- Simple and fast mounting
- 1/2 inch mounting standard
- Threaded holes for simple mounting without nuts
- Stylus available separately
- Made in Europe

Cartridge principle: MM (Moving-Magnet)

Output voltage at 1 kHz: 4 mV

Channel separation at 1 kHz: 25dB

Tracking ability at 315Hz: 80 μ m

Frequency response: 20 - 25 000 Hz (\pm 2 dB)

Stylus type: Nude Elliptical

Stylus tip radius: r/R 8/18 μ m

Tracking force, range: 1,6 - 2.0 g (mN)

Tracking force, recommended: 1,8 g (mN)

Tracking angle: 20°

Recommended load resistance: 47 k Ω

Recommended load capacitance: 150-300pF

Cartridge weight: 7,2 g

Reveal any details

The new premium Pick it MM 5 cartridge is manufactured by the phono cartridge experts at Ortofon and carefully voiced by the design team at Pro-Ject Audio Systems.

It is equipped with a nude elliptical stylus tip. This results in a highly detailed sound reproduction. The Pick it MM 5 reveals all micro details of a record which are hidden with a lower quality cartridge. The instruments can be located very clearly and vocals are separated from the stereo image creating a big sound stage.

The cartridge is made from a unique combination of technologies. One of which is Ortofon's well known split pole pins. This enables it to have a flat frequency response, which is comparable to MC cartridges.
